

With the Tablet Station powered by Hublet, you can protect your users with antibacterial protective screens. The screens are designed to kill 99% of bacteria on the surface of the touch screen, providing a safer and cleaner patron experience and alleviating the cleaning burden on your employees.

Safety at Your Fingertips

Tablet Station protective screens have agents that are harmless to humans but kill bacteria from the display. The screens are solvent-resistant, enabling library staff to also clean the touchscreens as necessary using traditional cleaning methods.

- Proven protection used on ATM machines, booking systems and kiosks.
- Antibacterial protection kills 99.9 % of the known bacteria from the touch screens.
- Produced and tested according to ISO 22196 - Measurement of antibacterial activity on plastics surfaces.
- No negative effect on a touch screen's functionality or sensitivity.
- Protects the screens against scratching and fingerprints.
- Matte and anti-glare surface enhances readability.
- One year warranty on protective screens.

The Installation Kit includes:

- Six screen protectors
- Two 70% Isopropyl Alcohol wipes to remove grease and dirt from the glass
- Installation stickers
- Microfiber cloth
