ENVISI❋NWARE®

Enriching Public Library Service Inside and Out

MOBILE PRINTING

EnvisionWare's mobile printing solutions were designed to make library printing easy and accesible to patrons on the go.

Flexible and Intuitive Printing Solutions

With mobile printing, patrons can print remotely or within the library from smartphones, tablets, and computers and pick up their printouts at the library. EnvisionWare offers two mobile printing solutions, depending on the needs and capabilities of your library:

- EnvisionWare's MobilePrint Service™ is fully integrated into LPT:One™, EnvisionWare's print management solution. To release their documents, patrons or guests enter their credentials at the LPT:One™ Print Release Terminal. Since the module is fully integrated into LPT:One, patrons can pay for print jobs using all of the standard LPT:One payment options. No new hardware is required and allows unlimited printers per building.

- PrinterOn® Hosted is the mobile printing solution for libraries set up to collect money for printing over the counter, or libraries who use another form of print management.

EnvisionWare's mobile printing solutions were developed in partnership with PrinterOn®, the world's largest cloud-based printing service.
