## San Bernardino Goes Mobile

When it comes to meeting the needs of mobile patrons, San Bernardino County Library is ahead of the curve. The library system, located in California, is offering mobile printing throughout their 32 locations.

“We see an increasing number of patrons coming into the library with their smartphones, tablets and laptop computers,” said Library Services Manager Steven Raughley. “The challenge was to find an easy way for these customers to print. EnvisionWare’s MobilePrint Service™ proved to be quick to install and intuitive to use.”

San Bernardino County Library started with two sites, a lab location and a test branch before rolling out the service. Based on the success of the rollout, the Library continued to install mobile printing in the remaining branches.
