LaSalle Public Library Saves on Printing and Streamlines Service

When LaSalle Public Library decided to offer computer and print management services, EnvisionWare Suite™ rose to the top of their selection list. EnvisionWare Suite includes PC Reservation® for computer management and LPT:One™ for print management.

“We’re making it more convenient for customers to use our computers, while freeing up staff time to help patrons find the information they need,” said Library Director Cristy Stupegia. “EnvisionWare has a strong reputation for reliability and responsiveness.”

LaSalle has a collection of over 65,000 items, and access to resources through its membership in the PrairieCat consortium and Reaching Across Illinois Library System (RAILS). The Library is offering computer management on the 8 computers in the adult section of the library, as well as print management for 4 computers in the Youth Services section.

The decision to offer computer and print management is part of the library’s commitment to leveraging and offering information technology as well to help cut printing cost.
