ENVISI⦿NWARE®

Enriching Public Library Service Inside and Out

EnvisionWare® eCommerce Services™ PCI Assurance

When it comes to managing credit card transactions, you want to make certain the process is easy and secure. EnvisionWare eCommerce Services is designed in partnership with VeriFone, a global leader in credit card payment processing, giving you peace of mind and confidence that your library is PCI compliant.

Removing the Burden

Cardholder data is never stored or exposed on your library's systems.

Our Implementation Consultants work with you to provide guidance for securing PCI compliance.

01 Patron credit card is scanned at the POS or kiosk card terminal

02 Encrypted payment data flows directly to acquirer or processor

Authorization is sent back to the POS terminal without customer payment information

04

03 Payment processing is managed by the credit card company in in their cloud environment, not on your website or servers

Comprehensive Data Breach Financial Protection Across the eCommerce Enterprise

With EnvisionWare, your library is automatically protected for a breach across the entire eCommerce enterprise, including terminals, web, and Point of Sale. There are no additional fees or forms to fill out and protection applies for both costs associated with a suspected breach and an actual breach, even if you are not PCI compliant.

- $100,000 per MID and up to $500,000 annual aggregate limit per merchant
- $0 deductible
- No additional fee
- Protection applies automatically
- EMV equipment upgrades in lieu of fines and penalties as a result of a breach

This protection is subject to local law.
