

LYNGSOE ERGO CART™

THE LYNGSOE ERGO CART™ STACKING CART IS THE ERGONOMIC CHOICE FOR MATERIAL TRANSPORTATION IN YOUR LIBRARY.

Reshelving with only One Touch

Instead of lifting materials from one container or cart to another, the Lyngsoe Ergo Cart™ makes it possible to transport the material directly from the sorter to the shelf and only touch the material once, when you place it back on the shelf.

Don't Bend - Push

At the push of a button, the Ergo Cart raises to horizontal, so no more awkward angles for your back. Just push the button to raise to an ergonomic height. The Ergo Cart is equally gentle for the materials, as the bottom automatically lowers material by material and minimizes damages from drops in the sorter.

Easy Docking and Charging

The Ergo Cart fits right into the Lyngsoe Ergo Chute™, which provides clear, visual light indicators of cart status – if you need larger volume, the Ergo Cart and the Lyngsoe Ergo Volume™ are easily interchangeable in the Ergo Chute. The Ergo Cart batteries charge in the chute and/or in a remote charging dock.

Fast Return to Circulation

Taking the finely sorted books on the cart directly from sorter to shelf, and with comfortable maneuvering, means fast return of materials into circulation and a reduced number of copies are needed to keep the service to patrons high.

Benefits

- Materials are only touched once – from Ergo Cart to shelf
- From sorter to shelf in the cart – books are quickly back in circulation
- Ergonomically correct posture of library staff during reshelving

Specifications

| | |
|------------------------|--|
| Weight | 23.5 kg / 51 lbs |
| Materials | Birch plywood with foil, steel frame |
| Maximum load | Maximum material load: 50 kg / 110 lbs Maximum material stack height: 700 mm / 27.6" |
| Suitable for receiving | Library items (books, magazines, CD/DVDs etc.) |
