

LYNGSOE ERGO STAFF™ 1200

THE ERGONOMIC STAFF INDUCTION FOR LYNGSOE SORT MATE™ 2000 SORTERS

Ergonomically Designed to Fit Library Staff

The Lyngsoe Ergo Staff™ 1200 is an induction point with built-in conveyor to the Lyngsoe Sort Mate™ 2000 system and is dedicated for use by staff. The staff induction is most commonly situated in the sorting room, but it can be located anywhere that fits into the system layout and better suits staff work routines.

Ergonomics in Control

By a simple push of a button, the Ergo Staff 1200 induction's countertop is height adjustable to ensure a comfortable, ergonomic standing or seated work position for staff. The optional, auto-leveling shelf can further improve ergonomics for staff.

High Operational Capacity

The Ergo Staff 1200 can be connected to the Sort Mate 2000 system. With the capacity to handle up to 2250 materials per hour, the Ergo Staff 1200 is convenient for in-house use or for large volume movements, such as inter-branch transfers.

Operation by a Slight Touch

Clear red/green light in the integrated button guides staff in the fast and simple check-in process. The Ergo Staff 1200 features RFID or the optional barcode scanner. The optional touch screen lists materials as they are checked-in, and provides information about returns when e.g. a data set is incomplete, and it allows staff to easily do backdating.

Benefits

- Ergonomically height adjustable
- Easy and user-friendly operation
- Dedicated for staff usage
- High check-in capacity
- RFID and/or barcode capability

LYNGSOE ERGO STAFF™ 1200
