

## LYNGSOE ERGO TROLLEY™

### CONTAINER FOR BULK COLLECTION AND TRANSPORT OF MATERIALS

#### Suitable for Larger Volumes

In terms of both material size and number of materials, the Lyngsoe Ergo Trolley™ offers a great flexibility. Fed by the Lyngsoe Sort Mate™ 2000 sorting system through the designated chutes or directly from a Lyngsoe Library Mate™, the trolleys are easily interchanged.

#### "I'm Full" Warning

As an option, a simple fill capacity indicator on the trolley frame will tell the Sort Mate 2000, when the trolley is full and alert staff to replace the trolley.

#### Easy Transportation

The trolley can also be applied as stand-alone container in connection with a self-service station providing easy transportation of a bulk of returned materials. The rounded edges and large wheels allow for steering over any flooring with minimal effort to move.

#### Minimal Drop And Pick-Up Distance

The integrated spring design automatically lowers and raises the trolley floor as the loaded weight changes. This minimizes the distance materials drop from the sorter and minimizes the need for bending the back for library staff when emptying the trolley.

#### Benefits

- Suitable for all materials
- Minimal drop and pick-up distance
- Minimal transport effort

# LYNGSOE ERGO TROLLEY™

## Specifications

Dimensions	935 mm L x 530 mm W x 905 mm H / 36.8" L x 20.9" W x 35.6" H
Weight	40 kg / 88.2 lbs
